Our mission is to provide customized investment management services to assist our clients in achieving their investment objectives.

Our Goal is a Better Financial Outcome:

To develop and manage a better financial outcome for your retirement by preserving capital and growing your investments. Our investment philosophy focuses on three key objectives:

Allocation Strategies

Redhawk manages three asset allocation strategies for the S&P 500 portfolios.

Our Process

In a highly volatile investment world, how can you build a plan for long-term success? What does it take to sift through thousands of investment opportunities and identify the relative handful that compliment your specific goals, time horizon, and risk tolerance? ***That's why we have a formal investment committee called the Redhawk Investment Committee ("RIC") that meets weekly to select, monitor, and replace investments.*** The RIC's overall goal is to always be invested in the top sub-categories and funds within those categories.

Investment Selection

The selection of an investment is a disciplined process and Redhawk analyzes several asset categories during the selection process. We use our proprietary scoring methodology to determine the top performing sub-categories to include in the S&P 500 strategies.

Top Sub-Categories

Investment Selection (continued)

Once the top sub-categories have been determined, the investment committee then researches the top performing funds in each sub-category. The overriding objective of the selection process is to determine which funds score the highest and are in the best interest of the client.

Investment Monitoring

The ongoing monitoring of investments is a regular process and monitoring confirms that the criteria remain satisfied and that a fund continues to be appropriate. The investment committee uses the bubble chart to monitor the funds on a monthly basis.

Investment Replacement

An investment can be replaced for many reasons such as poor performance, legal sanctions, closure to new investors by the investment provider, or that it may not be suitable for clients. ***Best of all, you don't have to do anything because we have full discretion to make changes to your account in a timely manner.*** As part of our process, we adhere to the following courses of action:

- **Approved** - The investment has been approved by the committee without any restrictions other than a minimum account balance and suitability.
- **Watch List** - The investment committee has placed the investment on the watch list for a specific reason based on pre-established criteria.
- **Restricted List** – The investment committee has restricted the investment, such as no new money can be invested.
- **Termination or Replacement** – The investment committee has determined that all assets will be transferred to a like fund.

Communicate

Risk Management Process

We understand that investors want to protect their assets when the market experiences a downturn. Redhawk has a comprehensive risk management process that incorporates the volatility index ("VIX") to determine if the portfolio should invest in defensive assets classes.

Our proprietary algorithms using the VIX determine when to be in the market or in a non-correlated asset classes.

CAPTURE UPSIDE AND LIMIT DOWNSIDE

We strive to find returns in down markets by going into non-correlated assets.
